

# Megabrite Unitized Mounted Points **A, B, and W** Shapes

## PRODUCT DESCRIPTION

Rex-Cut Unitized Mounted Points are made by combining non-woven nylon with resin and either Aluminum Oxide or Silicon Carbide to produce a versatile and resilient abrasive option for your deburring, blending, and finishing needs.

## AVAILABILITY

AO Medium, AO Fine, SC Medium, SC Fine, SC Fine Soft, SC Very Fine, and SC Very Fine Soft.

## BASIC APPLICATIONS

For **Light Deburring & Blending**, use Medium grade with high RPMs and moderate pressure.

For **Decorative Finishing**, use Medium to Fine grade with low RPMs and moderate pressure.

For **Polishing**, use Fine to Very Fine grade with high RPMs and low pressure.

*Use soft bonds when extra resilience is needed*

## TYPICAL APPLICATIONS INCLUDE

Slight burr removal on machined parts; blending minor tool marks on stainless, titanium, or exotic alloys; polishing edges and removing burrs on aircraft parts; debur and polish orthopedic implants and medical tools; polishing molds and dies; polishing engine parts; applying and matching decorative finishes on jewelry; reapplying satin finishes on stainless steel; and a great many others.

## INDUSTRIES SERVICED

Aircraft/Aerospace, Automotive/Transportation, Fabrication, Jewelry, Tool and Die, Medical, and many others.
